

The 14 boxes below should contain the text "ABCDEFabcdef" written in the font named on the left side. If any of those boxes is empty, your font configuration is incorrect.

In that case, make sure that the directories that contain your Postscript/TrueType fonts are correctly set in the listview of the "Font dirs" page of the "Settings/General" window. Also make sure that the "Font map" page of the same window contains a valid substitution entry for each of them.
